

Comp 3020
Assignment 2 Part 1
Joshua Lemer 7634755
Joshua Chan 7722727

(a)

Search for and find a movie
Place movies into lists
Create friends and track movies you recommend for them
Review movies
Store information on if and when you have seen movies

Search for and rate movie

0 Search for and rate a movie
 1 Go to movie's page
 1.1 Go to the "movies" page
 1.2 Enter Search word(s)
 1.3 Select filters
 1.4 Select the movie
 2 Select rating

Search for and place movie in list

0 Search for and rate a movie
 1 Go to movie's page
 1.1 Go to the "movies" page
 1.2 Enter Search word(s)
 1.3 Select filters
 1.4 Select the movie
 2 Select list to enter movie into

Create Friend

0 Create a friend
 1 Go to the "friends" page
 2 Select to add a new friend
 3.1 Enter in friend information
 3.2 Enter friend's name
 3.3 Select a profile picture
 3.4 Enter friend's favorite genres
 3.5 Save

(b) Note, highlighted areas in storyboards indicate where the user should be interacting with the interface to go to the next step.

Storyboard for creating a friend, and for rating a movie

Storyboard to add a movie to a list

(c)

The primary users of MovieOrganizer are men and women between the ages of 20 and 50. They're all native English speakers and well educated, but with technical skills varying from professional programmers to casual internet browsing abilities. They typically watch 1 to 5 movies per month. About half of the time they're watching movies with 1-3 friends, and the other half of the time, they're watching alone. They choose a lot of their movies by getting recommendations from their friends, and recommend movies to their friends often.

The secondary users of MovieOrganizer are mainly the friends and family of the primary users. They can range anywhere from 15 to over 80 years old, and don't necessarily have any skills with computers at all.

(d)

Users wanted to see the movies they've seen but not rated on the homepage.

One of the features of the application is the ability to search movies by title. In the low-fidelity storyboards, we included a search bar on the left in the "movies" page with the filters, but also a universal search bar in the top right of every page to quickly search from any page. However, it seemed like this distracted users who didn't notice the filtering system on the right, so we removed the universal search bar to redirect new users to the left side bar to learn the filtering features.

Users mentioned again that they wanted to be able to keep comments for individual movies on the movie pages.

Users requested a "recommend for" and "recommended by" system, where they can tag movies with specific friends, in order to track which movies are highly recommended for them, or not recommended for them, or recommended to the user by them. They also expressed interest in the ability to track which friends have seen which movies. More strongly though they wanted to be able to tag friends as preferring specific genres and titles, and to have a "current party" feature, where the user inputs users they're currently with, and the application shows the most commonly liked genres or titles in the group.

Users want to be able to see the title, year, and rating of movies from the movies page, and want to be able to filter out movies they've already seen or that they haven't seen. They didn't care about the optional grid view or list view for movies, so it is a low priority feature, but did want to be able to sort movies by Title, Genre, and Release date.

Users want to have a handy "shortlist" of movies they're considering in the short term. Not a "to be watched" list, but a list of movies they can easily access and keep for the duration of an evening or while deciding what to watch.

... ■ ■ ■

Click on an individual movie, either the title or image, to get to its page:

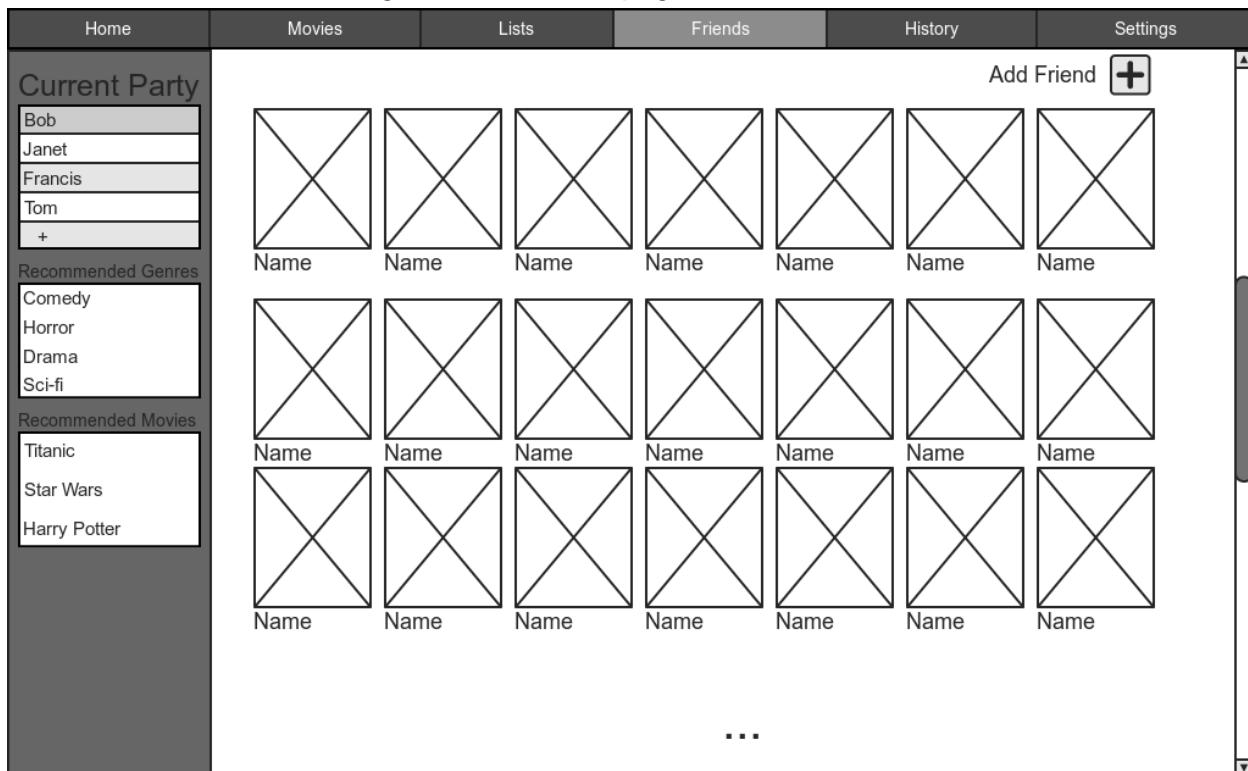

The screenshot shows a movie detail page. At the top, there's a navigation bar with tabs: Home, Movies (which is selected), Lists, Friends, History, and Settings. On the far right of the bar is a close button (X). Below the navigation is a search bar with placeholder text "Search". To the right of the search bar is a "Filters" section containing "Release Year" (with dropdowns for "From" set to 1990 and "To" set to 1995), "Tags" (listing "treats mockingbird", "Philz Coffee", "winners cookie", "snee", "Snow Leopard", "peasant mockups", "baby's first woot", "Kindle iPod", "California hills", and "Ritual Roasters hipsters"), and a "Genre" dropdown currently showing "Actor". Below these are sections for "Actors" (listing "actor 1", "actor 2", "actor 3", and a "+ Shortlist" button) and "Shortlist" (listing "Movie 1", "Movie 2", "Movie 3", and "Movie 4").

The main content area features a large movie poster placeholder with a large X. To its right is the movie title "Movie Title (2007)" in a large font, followed by "122 mins - Crime, Thriller - 8 June 2007". Below the title is a "Your Rating" section with a row of ten stars, all of which are filled. Underneath is a block of placeholder Latin text. Further down are sections for "Director", "Writers", and "Actors", each with placeholder names.

Below the movie details are two buttons: "See full cast and crew" and "Shortlist". Under "Shortlist" are buttons for "Recommended by..." and "Recommend for...", each with a "Josh x" and "Anne x" button. There are also two radio buttons for "Not Watched" and "Watched on" (set to 11/2/2014), and a "Notes" section with a text input field labeled "User's notes on the movie".

Click on the “Friends” tab to get to the Friends page:

The screenshot shows the friends page. At the top, there's a navigation bar with tabs: Home, Movies, Lists, Friends (which is selected), History, and Settings. On the far right of the bar is an "Add Friend" button with a plus sign. Below the navigation is a sidebar on the left containing sections for "Current Party" (listing "Bob", "Janet", "Francis", "Tom", and "+"), "Recommended Genres" (listing "Comedy", "Horror", "Drama", and "Sci-fi"), and "Recommended Movies" (listing "Titanic", "Star Wars", and "Harry Potter").

The main content area displays a grid of 24 placeholder movie cards, arranged in three rows of eight. Each card has a large X over it and a "Name" label below it. A vertical ellipsis "..." is located at the bottom center of the grid.

You can click on an individual friend to get their details:

The screenshot shows a user interface for a movie application. At the top, there is a navigation bar with tabs: Home, Movies, Lists, Friends, History, and Settings. The Friends tab is currently selected. On the left side, there is a sidebar with sections for "Current Party" (listing Bob, Janet, Francis, Tom, and a plus sign for adding), "Recommended Genres" (listing Comedy, Horror, Drama, Sci-fi), and "Recommended Movies" (listing Titanic, Star Wars, Harry Potter). The main content area is titled "Friend Name" and contains three rows of buttons: "Recommended for them:" with buttons for "Titanic(1998) x" and "Movie2(1949) x"; "Recommended by them:" with buttons for "Titanic(1998) x" and "Movie2(1949) x"; and "Favorite Genres:" with buttons for "Comedy x" and "Horror x", followed by a plus sign button. There are also edit and delete icons in the top right corner.

Or instead, you can click the “Add Friend” button to create a new friend:

The screenshot shows the same user interface as the previous one, but the main content area is now used for creating a new friend. It features a large input field labeled "Name" with a "Save" button and a delete icon to its right. Below it is a section for "Favorite Genres:" with a plus sign button. The rest of the interface, including the sidebar and navigation bar, remains the same.
